

ZEE Systems, Inc.

SERVICE LETTER 43-000

A. EFFECTIVITEY: All ZEE Systems, Inc. air conditioning systems using the SZ43-002-Series Motor Compressor Condenser Assembly.

B. REASON: This Service Letter gives recommended procedure for the addition of an optional hour meter to track system operating time for the purpose of accurate maintenance scheduling (TBO).

C. COMPLIANCE: Compliance is optional.

D. APPROVAL: Modifications suggested in this Service Letter are optional. These modifications do not effect the fit, form or function of the equipment. None of the modifications affect any critical system or component. Any modification or alteration should be done in accordance with AC 43.13-1B and with the approval of the governing civil aviation authority.

MATERIAL COST and AVAILIBTY: ZEE Systems, Inc. recommends that all materials and components be purchased from approved sources and that they are in condition for safe operation. Expense shall be that of the installer.

E. CHANGE: Below FIG. 1 is a recommend circuit for the addition of an hour meter. This service Letter does not provide any mounting or structural modifications for the installation of the hour meter.

1. Use wire that conforms to M22759/16-(size)-9.
2. Use Terminal Rings that conform to MS25036 specifications.
3. Identify new wire(s) and mark new wire(s) in accordance with AC43.13-1B.
4. Secure wire in accordance with AC 43.13-1B.
5. Make all required log book entries.
